What is unique about this program: ITS Financial Services, LLC provides Trust Funds, Surety Bonds, compliance and claims administration services for property brokers. The Internet Truckstop is the industry's largest freight matching service. ITS Financial provides bond information to Internet Truckstop. In turn, Internet Truckstop provides credit and performance data, as well as, a highly visible platform. By combining the two, valuable information about the Broker can be efficiently delivered to the Carrier and provide Broker members a marketing advantage.

How does the program work: The Broker establishes an IT Trust bond (Trust Fund or Surety bond(1)) with ITS Financial Services, LLC. The Broker maintains an "A" credit rating and experience factor with Internet Truckstop. The Broker keeps their bond free of valid claims. While these qualifications are met the Broker enjoys the marketing and support benefits of this innovative program.

The screenshot shows the Internet Truckstop interface. On the left, a list of loads is visible with columns for Bond, Line, TRLR, Age, F/L, and PI. The pop-up window contains the following text:
